"You know, you're fight, now that I think about it. All they do is make you exercise the brains you never ' knew you had." "They don't have to make sense. All they have to do is say you're different. Now do you get it? Your dad belongs to a group who made a lot of rules that he never had anything to do with, and because he's wired the same as everybody else, he needs to feel he's accepted. To be accepted, he has to be seen to go by the rules. If he didn't he'd become a threat to the group, and they'd reject him. And nobody can take that. Look around and watch all the crazy things people get into just so they can feel they belong to something that matters." Nanook looked mildly surprised. "Sure. I thought you'd know about it. There are some people here from your department to see Kath and a few Others." It took a second for Colman to realize what Sirocco was talking about. "Yes ... Why? What are you-". "Why would you think so?". direction will be halted by another roadblock somewhere beyond the truck stop.. Driscoll didn't have a ready answer to that. Besides, he was too conscious of the desire for a cigarette to be philosophical. He turned his head to look first one way and then the other along the corridor, and then looked back at the robot. "Can you tell if any of our people are near here?". A call came through from Brigade, and Sirocco switched into the audio channel to take it. Colman sat back and looked around. The indicators and alarms on the console in front of him had nothing to report. ', It's time to do a round anyhow." Sirocco nodded and carried on talking inside his helmet. Colman shouldered his M32 and left the guardroom.. The painter shrugged. "You just know. How do you know when you've had enough to eat?". And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than ill the weapons of the Mayflower II combined. She was staring at her own extinction.. "So have I," Colman said. "And it's worse than that, he's setting up a missile strike right now. The target has to be the Kuan-yin." Fate possessed the sharper teeth, the stronger jaws.. "Are there any more objectors?" Stern inquired. The Two Moons occupied one end of the basement and ground-floor levels of a centrally located confusion of buildings facing the maglev terminal complex across a deep and narrow court, and had a book arcade above, which turned into . residential units higher up. It comprised one large bar below sidewalk level, where floor shows were staged most nights, and two smaller, quieter ones above. Kath suggested one of the smaller bars and Colman agreed, permitting himself for the first time the thought. that a pleasantly romantic interlude might develop, though why he should be so lucky was something he was far from comprehending. If it happened, he wasn't going to argue about it.. "What makes you imagine that I could?". he could find the willpower to deal with them.. determination to accomplish the far more difficult task of redeeming her own screwed-up life.. Kath smiled on the other side of the room. "I was from the first batch to be created. There were a hundred of us. Leon -he's Adam's father--was another. We called the machine that taught us how to use firearms Mickey Mouse because it had imaging sensors that looked like big black ears. I shot a daskrend when I was six... or maybe less. It came at Leon from under a rock, which was why the satellites hadn't spotted it. He's still got a limp today from that." She emitted a soft chuckle. "Poor Leon. He reminds me of Lurch." Music began playing, the crowd dispersed back to the bar and tables, and conversations started to pick up again. Colman and his companions went back upstairs, and Driscoll collected another round of drinks from the bar while the others sat where they had been earlier. They talked for a while about the incident, agreed it was a bad thing to have happened, wondered what would come of it, and eventually changed the subject.. might be.. wind, I am birds in flight, I am the sun, I am the sea, I am me!" '-You'd have to feel kind of sorry for someone like that. The least you could do was make sure they got fed and looked after properly. We do get a few like that, and that's what happens to them. It's a shame, but what can anybody do?" -." Carson doesn't know what to do with it," Driscoll. even if he were that kind of pervert, because he pities me the way you would pity a truck-smashed dog. Merrick glared across the desk suspiciously. Evidently he wasn't getting the answers he wanted. "His Army record isn't exactly the best one could wish for, you know. Staff sergeant in twenty-two years, and he's been up and down like a yo-yo ever since lift out from Luna. He only joined to dodge two years of corrective training, and he was in a mess of trouble for a long time before that." "I'm not sure. I guess I couldn't have been listening that much." "Blow the locks, split into two groups, and pull back to the exits at the module pivot-points," Armley answered.. "Sure. What could be crazier than the Army?". The Chironians had both complied with the Mayflower II's advance request for surface accommodation and anticipated their own future needs . at the same time by developing Canaveral City and its environs in the direction of Franklin to a greater degree than their own situation then required. So far about a quarter of the Mayflower II's population had moved to the surface, but the traffic was slowing down since they were not moving out into more permanent dwellings as rapidly as the Chironians had apparently assumed, mainly because the Directorate had instructed them to stay where they were. Room to house more was running out, and those left in the ship were, understandably, becoming restless.. "If a chip can do the job, a man's life is probably better spent doing something else anyway." "HE'S AMAZING, ISN'T he," Shirley said in an awed voice as she leaned forward to get a better view of the table over the shoulder of her daughter, Ci, who was sitting on the floor. "It must be a genetic mutation that makes sticky fingers or something." "I hope so too," Kath said with feeling. "I ought to go now and see them off. Take care, Leon." "What does a Chironian computer print when you attempt illegal access?" one of them asked Colman when they had got into their joke repertoires.. And perhaps his mother's spirit watches over him.. and insanity. Regardless of who her father might have been, Klunk or not Klunk, she was undeniably her. The other members of Red section in the row of seats to the left of him and those of Blue section sitting with Hanlon and Sirocco in the row ahead were strangely silent as they watched the screen where the bright half-disk of Chiron hung in the background: the first real-time view of a planet that some of them had ever seen. Farther back along the cabin, reflecting the planned order of emergence,

General Portney was sitting in the center of a group of brass-bedecked senior officers, and behind them Amery Farnhill was tense and dry-lipped among his retinue of civilian diplomatic staff and assistants. In the rear, the SD troops were grim and silent in steel helmets and combat uniforms festooned with grenades, propping their machine rifles and assault cannon between their knees. He turned his head to look into the room at where she was sitting on the sofa below the wall screen, introducing Marie to the mysteries of protein transcription diagrams courtesy of Jeeves and grinned to himself; she was becoming even more impatient than he was. Some days had passed since he told her he was in touch with Colman again and that before the travel restrictions were tightened, Colman had often accompanied Jay on visits to their friends among the Chironians in Franklin, to which Jean had replied that it would do Jay good, and she wanted to meet the Chironians herself. Maybe there would even be a nice boyfriend there for Marie, she had suggested jokingly. "A nice one," she had added in response to Bernard's astonished look. "Not one of those teenage Casanovas they've got running around. The line stays right there." "We're not negotiating, Sherlock." "You never asked me," Swyley answered over his shoulder. "Where was she institutionalized?" he crouches motionless until he is sure that the noise has drawn no one's attention. Out there until the Beagle Boys have hammered themselves into exhaustion. "The Circle serves all age groups now. It really works. You learn there may be a million questions in life witnesses. The atmosphere generally was cheerful enough: entertainments, what appeared to be business premises, a few bars and eating places, an art exhibition, and, incongruously, a troupe of clowns performing, mid-corridor, to a delighted audience. Is there something wrong?" house of the congressman's lover. The Orderly Room was chaotic as Sirocco, Maddock and Sergeant Armley from First platoon were trying to put out what looked like a fire of flashing lamps on the emergency command panel when Colman stuck his head round the door less than half a minute later. What are those alarms? Lesley, do you hear me?" Pernak knotted his brow, pursed his lips, then stretched them back to reveal his teeth. "Then those people should look after their own future instead of waiting for someone else to work it out for them. That's the old way. They have to learn to think the Chironian way." After a second of hesitation he added, "—that's what Eve and I are going to do." "Oh, I don't know... four, five, maybe.
